5. Introduction

Risk Management is the combination of systems, processes, procedures and culture that facilitate the identification, assessment, evaluation and treatment of risk.

The Risk Management function is designed to provide for:

- an organisation-wide understanding of risk and the importance of its management;
- appropriate risk taking;
- protection against personal injury and property damage;
- planning to reduce or control foreseen or unexpected costs or events;
- an ability to identify and to respond to risk in a manner that maximises opportunities;

- protection of assets from planned and unplanned events;
- sound insurance management practice; and
- the quantification of risks as they materialise.

6. What is Risk?

The *Victorian Government Risk Management Framework* defines risk as 'the effect of uncertainty on objectives'. Risk is an inherent part of service delivery which needs to be considered and addressed by everyone, whether positive (opportunities) and/or negative (threats).

7. Risk Management Principles

Neighbourhood Watch Victoria has adopted the risk management principles from AS/NZS ISO 31000:2009 therefore aspiring risk management to;
